Understanding aviation, mitigating risk

McLarens Aviation is the leading provider of claims, risk and asset management services to the global aviation industry. Founded in 1964, we handle in excess of 3,500 assignments each year via a network of 32 locations worldwide. For over 50 years we have been the organisation that people turn to when they require the very highest levels of industry knowledge and risk expertise.

We have built a comprehensive risk management capability, underpinned by decades of analysing, managing and reporting on literally tens of thousands of accidents and incidents worldwide. This experience has given us a unique understanding of what can happen, enabling us to help you anticipate and prepare for what could happen.

Our team of dedicated professionals, all drawn from the aviation industry, bring the knowledge, skill and most importantly the hands-on experience necessary to help you navigate today's complex risk management environment.

Our clients include:

- Aviation insurers and brokers
- Investors and financiers
- Petroleum and mining companies
- Aircraft lessors
- Maintenance repair organisations
- Airlines and operators
- Ground handling and de-icing companies
- Airport operators

An integrated approach

The aviation business is in a constant state of flux where the saying 'life is too short to make all your own mistakes' has never been more relevant. Such an environment calls for a business partner with a broad knowledge base that can offer an integrated approach to meet your needs. McLarens Aviation is that partner.

Our detailed understanding of how airports, airlines, maintenance providers and ground handling companies operate, interact and mitigate risk, allows us to present 'real world' solutions to the challenges faced.

While many conduct risk reviews as 'tick box' exercises, we assess on-the-ground realities. Our hands-on industry experience, including extensive exposure to litigation surrounding accidents and incidents, allows us to deliver practical recommendations that address both the underlying risk issues and their potential consequences.

This breadth of in-house expertise has led to our integration of what are typically considered separate functions into six core modules that together present a dynamic capability.

Why McLarens Aviation?

A great reputation

We have built an enviable reputation and proven track record spanning over 50 years.

The best people in the business

We have in excess of 80 in-house specialists in their respective fields to ensure a consistent and high quality service.

A truly global reach

Operating from 32 locations in 21 countries worldwide provides not only a rapid, cost efficient response, but brings local knowledge and language skills.

A flexible and solution driven culture

Our integrated modular approach provides you with the flexibility to draw on expertise from just one area or to combine various modules to achieve a complete solution.

The highest levels of quality and integrity

With our AS9100 and ISO9001 accreditations for the London Operation and EASA Part M approval as a Continuing Airworthiness Management Organisation (CAMO), you can be assured of the highest levels of quality and service in the business.

EASA Part M Subpart G approval no. UK.MG.0641
